

ETS

ENABLING  
YOUR  
SUCCESS.

MANAGING COMPLEXITY.  
SIMPLIFYING READINESS.

At ETS we deliver complex, sophisticated technology solutions that help our customers accomplish their most demanding missions. Through ETS capabilities, we support force and asset operations and enable effective decision-making on and off the ground.

Working closely with many of the world's leading platform and systems OEMs, our depth of understanding ensures we provide high-performance solutions on time – and on budget

## **SYSTEMS INTEGRATION**

ETS integrators develop some of the region's most complex systems using state-of-the-art components, ensuring full interoperability.

## **ICT INFRASTRUCTURE ARCHITECTURE**

ETS designs and implements robust, high-performance architecture for all types of networks; data centres; communication links for data, audio and multimedia and mission execution.

## **INTEGRATED LOGISTICS SUPPORT**

ETS procurement management services include specification design, product qualification, compliance, purchasing, configuration, testing and validation. Our solutions also encompass cyber security, integration, commissioning and documentation.

## **TRAINING AND SIMULATION**

ETS configures in-depth training solutions that incorporate the most precise mission details and scenarios, then capture critical data on performance, behaviour and response.

## **STAFF AUGMENTATION AND OUTSOURCING**

ETS also provides critical and non-critical staff augmentation, outsourcing and managed services solutions for leading defence and civilian customers.
